

Synching new JHED password to your off-site laptop

When you get flagged for an expiring password from one of the JHU systems please proceed to follow the instructions for changing it. Once complete and you have a new JHED password AND you use your JHED ID to sign into your laptop please complete the following steps.

You'll either be signed in to your laptop with your old password or you'll need to sign in with your old password.

- Connect to JHPulse using your new JHED password.
- Once connected hit Ctrl-Alt-Del and lock the computer.
- Wait about 30 seconds then repeat Ctrl-Alt-Del to unlock the computer and enter your new password.
- Restart the laptop, sign in with your new password.
